

Every journey is a series of steps that lead to the goal.

Patience has its own rewards.

Taking the first step is the hardest part of the challenge.

Many small obstacles can add up to a large problem.

Small obstacles have up and down sides.

Live on your own words, not on someone else's.

Falling is the best way to learn.

Some paths are clearer than others.

Some paths are straight forward.

A choice may be made, but the path is already set.

The choice doesn't matter, it's the same.

If you don't like where you are, try doing something else.

When you return to where you were, things won't always be the same.

We fall down when we are, but we get up when we are not.

Building a bridge can get you over a problem.

Some hurdles are too high to jump over.

Life is full of ups and downs.

Connecting the pieces can solve a puzzle.

Life has a way of putting us in the right direction.

The end may come, but it's not always what you expect.

Life isn't about getting to the end.

It's harder to respect if you're leaving things behind.

The further we get, the less we need.

Moving forward may require making the most of what you've got.

Some tasks require a lot of care and observation.

Taking one path often leads to another.

A path may not be right or wrong, it may just be different.

Look a little harder, and you will find a way forward.

Working into the unknown can lead to great rewards.

If you're only focusing on the end, you won't have enough for later.

A dead end will only show you if you don't try to move through it.

There's nothing wrong with taking the right path.

We often fall into things when we least expect it.

What leads out of one thing can be a new step away.

There are multiple ways to approach a situation.

When you're left with nothing, the only way to go is up.

Some actions are more obvious than others.

Here we perceive a problem can change every time we see it.

The solution to a problem may change through a lot of it.

Spinning through a problem may help you find the solution.

Repeating through a problem may help you find the solution.

If you never try, you'll never know.

Raw experience may be the only option when you're not sure.

Some problems just come down to luck.

The world is full of things you can't see.

A problem may only be difficult when you're not trying to solve it.

What we do after the problem is what we can do best.

Some things can be done in a different way.

Some things can be done in a different way.

What we do after the problem is what we can do best.

Some things can be done in a different way.

Some things can be done in a different way.

Some things can be done in a different way.

Some things can be done in a different way.

Some things can be done in a different way.

Some things can be done in a different way.

Some things can be done in a different way.

Some things can be done in a different way.

Some things can be done in a different way.

Some things can be done in a different way.

Half way through is half way finished.

The problem may not be where you're going, but where you're not.

New skills enable further progress.

Mastering a skill requires practice.

A little less direction can get you out of your way.

Solving a problem may require something else.

Two much curiosity can get the best of us.

Signs may be helpful, but they're not always.

Understanding a problem may require something else.

Small things can take you great distances.

The path of least resistance is a wild one.

We never have high, but we're always more to achieve.

Falling down isn't the end, but it's a warning.

The world is full of things you can't see.

Some things can be done in a different way.

Some things don't have a deeper meaning.

The right decision at the right time get you where you want to go.

Some things can be done in a different way.

With forethought, things have a way of just working themselves out.

Some challenges are far harder than they first appear.

To get past a problem, you may just need to have something to go on.

Getting to a solution requires cutting out what doesn't work.

The further we explore, the more we can see.

A solution of opportunity can lead to new ideas if you're willing to take a risk.

The world is full of things you can't see.

When you have enough resources, you can start growing more.

You can grow a garden anywhere.

The best solution may still be the most obvious one.

If you lead the way, others will follow.

Straightforward problems can often require a creative solution.

If you're missing information, it's critical.

When you look beyond the surface, there may be more to find.

Sometimes you only have just enough to get by.

When what you have is far less than you need.

Getting where you want may require some luck.

Throwing yourself into things can take you to new heights.

Similar problems can have entirely different solutions.

Some events happen when we want them to.

Old solutions can apply to new problems.

The consequences of one choice can cut off all other choices.

At times we need to view the world from someone else's perspective.

Sometimes you need to be carried.

There comes a time when you can work your way through anything.

With more experience, previous challenges aren't as difficult.

There's no need to take apart what already works.

A few steps beyond the surface, there may be more to find.

Obvious problems can often require a creative solution.

Getting to the end requires taking the last step.

The world is always changing, and it's hard to keep up.

Sometimes we do things just to keep going.

The more we complete, the more we find.

Some challenges can be solved when we have enough.

You can't do everything yourself.

The world is full of things you can't see.

Feeling behind can lead to everything being lost.

Some problems can't be solved until you're more experienced.

We move on when there's nothing left to learn.

Complicated problems can often require a creative solution.

We can appreciate the value of what we have when we have it.

Every journey comes to an end.
