

Every journey is a series of choices. The first is to begin the journey.

Patience has its own rewards.

Taking the first step can be harder than the rest of the challenge.

Many small obstacles can make for one large problem.

Some choices leave us running around a lot without really getting anywhere.

Live on your own words, not on someone else's.

Failing to succeed does not mean failing to progress.

Some paths are clearer than others.

Some paths are straight forward.

A choice may be as simple as going left or going right.

The choice doesn't matter if the outcome is the same.

If you don't like where you've ended up, try doing something else.

When you return to where you have been, things aren't always as remembered.

We fall down when there is nothing there to support us.

Building a bridge can get you over a problem.

Some problems just come down to size.

Some hurdles are too high to jump over.

Life is full of ups and downs.

Connecting the pieces can solve a puzzle.

Life has a way of pushing us in the right direction.

The end may come when you're ready to get there.

Life isn't about getting to the end.

It's harder to leave things behind.

The further we get, the less help we need.

Having forward may just require a lot of care and observation.

Some truths require a lot of care and observation.

Taking one path of often a problem may just be different.

A path may not be right unless you may just be different.

Look a little harder, you will get a way forward.

Waiting for the solution may be the only option after all the great rewards.

If you're only focusing on the solution, you won't have enough for later.

Some problems just come down to size.

A dead end will only stop you if you don't try to move through it.

Being a certain way may require looking at your own life.

There's nothing wrong with taking shortcuts.

We often fall into things when we least expect.

What looks out of order may only be a few steps away.

There are multiple ways to approach a situation.

Some outcomes are more forward than others.

Now we perceive a problem can change every time we see it.

The solution to a problem may just require a lot of care and observation.

Nothing through a problem may just be different.

Moving through a problem may just be different.

If you never try, you will never know.

Some problems may be the only option after all the great rewards.

The world is only what we see it to be.

Some problems just come down to size.

Some problems just come down to size.

A problem may only be difficult when you're missing the right tools.

What we see as a problem may only be a few steps away.

Some choices can leave us running around a lot without really getting anywhere.

Settling a problem or may help you find the answer.

What appears impossible may have a very simple answer.

If you take time of what's more, it may be less than when you need it.

Too much curiosity can get the best of us.

Signs may be helping you more than you realize.

Challenging a problem requires a lot of care and observation.

Small steps can take you great distances.

The path of least resistance is a valid option.

No matter how high you climb, there's always more to achieve.

Falling down teaches us how to get up and try again.

The world is only what we see it to be.

Some problems just come down to size.

Some problems just come down to size.

Half way through is half way finished.

The problem may not be where you're going, but how to get there.

New skills enable further progress.

Mastering a skill requires practice.

A little bit of direction can get you out of your way.

Trying harder and you will get to where you want to be.

Some doors are closed until you open them.

When you see a new horizon, you may notice things that you didn't see before.

By a little deeper and you may find something new.

Attention to detail can lead to a very rewarding outcome.

Solving a problem may require trying different things until we find what we need.

Old skills are useful even after we have learned new ones.

The right answer may also be the most obvious one.

Some doors are closed until you open them.

Some doors are closed until you open them.

Some doors are closed until you open them.

Some things don't have a deeper meaning.

The most difficult of the right time will get you where you want to go.

Some choices are only what we see them to be.

With forethought, things have a way of just working themselves out.

Some choices are only what we see them to be.

To get past a problem, you may just need to keep pushing through it.

Getting to a solution requires cutting out what isn't a work.

The further we explore, the more we learn.

A solution of everything on hand to new places you are willing to take a little risk.

The world looks different on the other side.

When you have enough resources, you can start growing more.

You can grow a garden anywhere.

The best solution may still be the most primitive one.

If you lead the way, others will follow.

Simplest forward problems can often require complicated solutions.

Simplest forward problems can often require complicated solutions.

If you're missing information, it's only because it's missing.

When you look beyond the surface, there may be more to find.

Sometimes we only have just enough to get by.

When what you have is not enough, find ways to turn it into more.

Getting where we want may require jumping through some hoops.

Turning yourself into things can take you to new heights.

Similar problems can have entirely different solutions.

Some events happen when we want them to or not.

Old solutions can apply to new problems.

The consequences of one choice can cut us off from making others.

At times we need to view the world from someone else's perspective.

Sometimes you need to be carried.

There comes a time when you can work your way through anything.

With more experience, previous challenges aren't as difficult.

There's no need to take apart what already works.

There's no need to take apart what already works.

A few steps, but you're moving forward.

Obvious problems may require unusual solutions.

Getting to the end requires trying off the beaten path.

The world is always finding ways to surprise us.

Sometimes we do things just to go along for the ride.

The more we complete, the harder it gets to find what we need.

Some challenges exist just to test how much we know.

You can't do everything yourself.

The world is full of secrets waiting to be uncovered.

Pushing behind the curtain may show us everything we need.

Some problems can't be solved until we're more experienced.

We move on when there is nothing left to learn.

Complicated problems are often solved by the way we look at them.

We can appreciate the entire journey as long as we have come.

Every journey comes to an end.

Every journey comes to an end.
