

Every journey is a series of steps that lead to the goal.

Patience has its own rewards.

Taking the first step is the hardest part of the challenge.

Many small obstacles can add up to a large problem.

Small obstacles have up and down sides.

Live on your own words, not on someone else's.

Falling is the best way to learn.

Some paths are clearer than others.

Some paths are straight forward.

A choice may be made, but the path is already set.

The choice doesn't matter, the path is the same.

If you don't like where you are, try doing something else.

When you return to where you were, things won't always be the same.

We fall down when we are not careful.

Building a bridge can get you over a problem.

Some hurdles are too high to jump over.

Life is full of ups and downs.

Connecting the pieces can solve a puzzle.

Life has a way of putting us in the right direction.

The end may come earlier than we expect.

Life isn't about getting to the end.

It's harder to see the end of the road.

The further we get, the less we need.

Moving forward may require making the most of what you've got.

Some tasks require a lot of care and observation.

Taking one path often leads to another.

A path may not be right or wrong, it may just be different.

Look a little harder, and you will find a way forward.

Working into the unknown can lead to great rewards.

If you're only focusing on the end, you won't have enough for later.

A dead end will only show you if you don't try to move through it.

There's nothing wrong with taking the short-cut.

We often fall into things when we least expect it.

What leads out of one thing can be a new step away.

There are multiple ways to approach a situation.

When you're in a bind, the only way to go is up.

Some obstacles are more obvious than others.

Here we perceive a problem can change every time we see it.

The solution to a problem may change through a lot of it.

Spinning through a problem may change the right result.

Repeating through a problem may change the right result.

If you never try, you will never know.

Raw materials may be the only option, but they can be used in many ways.

Some problems just come down to luck.

The world is full of things, but we only see what we want to see.

A problem may only be difficult when you're missing the right tools.

What we do after the problem is what we can do best.

Some changes can lead to a new direction.

Griffing a problem is the only way to find the answer.

What's the worst that can happen?

If you're right of what's wrong, it may not be the worst when you need it.

Two much curiosity can get the best of us.

Signs may be helpful, but they're not always.

Understanding a problem can change the result.

Small things can take you great distances.

The path of least resistance is the way to go.

We never have high enough standards.

Falling down isn't the end of the world.

The world is full of things, but we only see what we want to see.

The world is full of things, but we only see what we want to see.

Half way through is half way finished.

The problem may not be where you're going, but how to get there.

New skills enable further progress.

Mastering a skill requires practice.

A little less direction can get you lost.

Solving a problem may require something else.

Try less, and you'll get where you want to go.

Some don't want to take action.

When you're in a bind, the only way to go is up.

How a little deeper and you'll find something new.

Attention to detail can lead to a new result.

Solving a problem may require something else.

Old skills are useful even after we've learned new ones.

The right answer may also be the most obvious one.

Some obstacles are more obvious than others.

Some things don't have a deeper meaning.

The right decision at the right time get you where you want to go.

Some changes are only useful when we need them.

With forethought, things have a way of just working themselves out.

Some challenges are far harder than they first appear.

To get past a problem, you may just need to keep putting through it.

Getting to a solution requires cutting out what doesn't work.

The further we explore, the more we learn.

A solution of opportunity can lead to a new result.

The world is full of things, but we only see what we want to see.

When you have enough resources, you can try something new.

You can grow a garden anywhere.

The best solution may still be the most obvious one.

If you lead the way, others will follow.

Straightforward problems can often require a creative solution.

If you're missing information, it's critical.

When you look beyond the surface, there may be more to find.

Sometimes you only have just enough to get by.

When what you have is far better than what you need.

Getting where you want may require something else.

Throwing yourself into things can lead you to new heights.

Similar problems can have entirely different solutions.

Some events happen when we want them to.

Old solutions can apply to new problems.

The consequences of one choice can lead to a new result.

At times we need to view the world from someone else's perspective.

Sometimes you need to be carried.

There comes a time when you can work your way through anything.

With more experience, previous challenges aren't as difficult.

There's no need to take apart what already works.

A few steps beyond the surface, there may be more to find.

Obvious problems can often require a creative solution.

Getting to the end requires taking the last step.

The world is always changing, and we have to keep up.

Sometimes we do things just to keep going.

The more we complete, the more we learn.

Some challenges can lead to new heights.

You can't do everything yourself.

The world is full of things, but we only see what we want to see.

Putting things in the past can lead to a new result.

Some problems can't be solved until we're more experienced.

We move on when there's nothing left to learn.

Complicated problems can often require a creative solution.

We can appreciate the value of what we have.

Every journey comes to an end.
